LOOKING FOR

Mechatronics

Engineer/Technician(m/f/d) in Santiago, Chile

ABOUT US

After the foundation of our startup in 2019 in Germany, our young and dynamic team continues to grow with one main purpose: use innovation and digital technologies to improve and revolutionise livestock farming processes while benefiting both animals, farmers, the environment and society. With our first product, the "Pig-Counter", we start to fulfill our mission of bringing digital solutions to farmers from around the globe.

JOB DESCRIPTION

We are looking for someone to join our team in Chile with qualities to lead the technical development and adaptation of our Pig-Counter M to the needs of the local market. Do you believe it could be you? Then, you will autonomously support the adaptation and development of hardware and infrastructures to our operational sales and distribution plan. The optimisation and supervision of technical processes within the integration of the product in the Chilean market and into our international launch will be your main tasks.

Additionally, we may require support in certain tasks related to software development. Engineers, technicians as well as advanced level students are suitable for the position.

REQUIREMENTS

- Studies (completed or in progress) in Mechatronics Engineering or Higher Level Technician in Mechatronics or similar
- Basic knowledge in hardware development, especially embedded systems development
- Previous experience with camera systems or advanced knowledge in the topic are highly valued
- Previous experience as a technician or in hardware development or optimisation is preferred
- Basic knowledge in Python programming
- Knowledge in the area of image processing (OpenCV,...)
- Preferably experience or knowledge in the area of ML (Tensorflow/Pytorch,...)
- Basic knowledge in continuous integration and deployment (CI/CD)
- Preferably previous experience with Gitlab or similar
- Basic knowledge of versioning and multithreading systems
- Knowledge in the area of socket communication
- Very good english skills

BENEFITS

- Get to be part of a young and international team, full of motivation and desire to make an impact in the world, in a warm environment of cooperation and commitment
- The opportunity to quickly take on your own responsibilities, become an essential component in our company's growth and implement your own ideas and projects
- Flexibility in organising your work, schedules and tasks
- Possibility to learn and improve your professional and personal skills by being part of the challenges and opportunities that being part of a startup brings
